

TOMAHAWK: Campfire Table

tomahawk™

Designer: Tomek Archer 2002

Dimensions: 1100D x 360H mm

Finishes: Ash, Walnut, Rock Maple, White, Black, Red

The Campfire Table makes reference to the timeless ritual of human gathering.

The base is made using a single length of solid timber, cut into three equal lengths. A complex tectonic transformation within the joints allows the three identical elements to pack flat and assemble without additional fixings.

The table is made using sustainable timbers and since it requires very limited energy in production and packs flat for efficient shipping, it also has very low embodied energy.

Designed by Tomek Archer in 2002 while he was studying Architecture, the Campfire Table has been recognised with several awards including The Edge Commercial Design Award at The Australian International Furniture Fair and an Australian Designmark in 2005.
