

MAX: The Stones Barstool

Designer: Marco Maran

Dimensions: Heights: 740/620/450 x Width 440 x Depth 310mm

The Stones Barstool is suited for both the contract and the residential market. The philosophy of the product is condensed into a design that knows no predefined symmetries or geometrical shapes.

The Stones has been made through a technological transfer from the automobile to the furnishing sector. The result is immediately evident from the characteristics of the seat, which is particularly striking not least because of the finishes: hi-gloss paint in a choice of orange, white, metalized grey and black gives an iridescent effect with hues that change according to the light and the angle of vision.

The supporting frame is in stainless steel and is made along asymmetrical lines that enhance the design of the seat. The hole is not just an aesthetic element but emphasises the functional nature of the stool, which is easy to move thanks to this structural peculiarity.

Barstool 740H x 440W x 310D mm

Kitchen Bench Stool 620H x 440W x 310D mm

Table Stool 450H x 440W x 310D mm
